Welcome to Collections App

Tech stack:

    | Frontend : React
    | Backend : Node.js / Express
    | Data base: MongoDB / S3 bucket
    | Deployment: Docker

Functionality :

    | Main page displays list of 5 biggest collections and 5 recently added items
    | Every registered user can create his own collections
    | Each collection is editable and customizable - while creating it is possible to define fields which every item of this collection will later have.
    | Images are stored in s3 bucket.
    | User can display the list of item to sort/remove them
    | Every item has likes (1 per user) and comment section (1 level of nesting)
    | Dark mode available
    | Admin has access to the user panel. Admin credentials
    email: admin@admin.pl , password: admin
    | Auto-logout
